PROJECTS

1, Weather Forecast Application (ReactJS): -

- Designed and developed a weather forecast application using ReactJS and OpenWeatherMap API.
- Utilized React Hooks for state management and Axios for data fetching.
- Implemented responsive design using Material-UI and TailWindCSS Flexbox for optimal user experience on desktop and mobile devices.
- Designed and implemented a user-friendly interface that allows users to search for and view current weather conditions and a 5-day forecast for any location worldwide.
- Optimized application performance through asynchronous data loading and caching of API responses.
- Collaborated with a team of developers using Git and GitHub for version control and code management.
- Contributed to the application's testing and debugging using Jest and React Testing Library.
